WHY CHOOSE PUBLIC HEALTH?

In USJ’s Public Health program, students learn the science and art of preventing disease and promoting health through organized community effort. While traditional medical fields treat individuals, the public health field focuses on the health of communities and populations. Through USJ’s interdisciplinary curriculum, students graduate with a strong foundation in the natural sciences and the liberal arts, ensuring they enter the workforce with the tools necessary for success.

CAREER OPPORTUNITIES

A degree in Public Health opens doors to a variety of careers in government agencies, nonprofit organizations, and corporations, serving as:

» Health Educators
» Food Policy Analysts
» Research Assistants
» Health Communication Specialists
» Peace Corps, AmeriCorps, or FoodCorps staff
ACADEMIC DISTINCTIVENESS

As Public Health majors, students combine coursework, internships, and other experiential learning, preparing them to:

» Identify the health needs of communities
» Promote health and reduce health disparities
» Monitor diseases
» Develop educational campaigns
» Conduct original research
» Pursue an advanced degree
