In USJ’s unique 3+3 Pharm.D. program, students devote three years to undergraduate coursework, applying to the Pharmacy program in their third year and, upon acceptance, completing their Pharm.D. in the next three years.

All students receive individual attention from our highly qualified and dedicated faculty.

Highly-efficient three calendar year curriculum

PHARM.D. GRADUATES ARE IN HIGH DEMAND!
- The demand for Pharmacy services has resulted in a dramatic increase in salaries in all sectors of pharmacy. **Pharmacist starting salaries average $100,000.**
- Employment of pharmacists is projected to **grow 14% from 2012 to 2022**
- **Pharmacy is number one** on Kiplinger’s list of “Ten Best University Majors for a Lucrative Career.”
  – Yahoo Finance, August 2012

ACADEMIC DISTINCTIVENESS
While most doctor of Pharmacy programs follow a four-year plan of study, the USJ Pharm.D. curriculum is completed in three calendar years. You will move through the program as part of a group, studying one course at a time and mastering the subject material. The experiential component of the program occurs throughout the entire curriculum.

CAREER OPPORTUNITIES
- Community and regional hospitals
- Emergency departments and trauma centers
- Community pharmacies
- Long-term care facilities (e.g., nursing homes and other rehab centers)
- Nuclear pharmacies
- Veterans Administration hospitals
- Pharmaceutical industry, including research
- Federal government offices
  (FDA, CDC, PHS, Indian Health Service, Military)
- State government agencies
  (Consumer Protection, Commission on Pharmacy)
- Compounding pharmacies (preparing individually specialized dosages and dosage forms of critical drugs)
- Home infusion centers (providing intravenous dosages for home-bound patients)
- Medical clinics and physician offices
- Hospice care centers
- Professional organizations and NGOs
  (e.g., CT Pharmacists Association)
- Academia
Our School of Pharmacy program integrates classroom knowledge and professional performance to ensure competency in patient care. This is a program that focuses on practice professionals, the people who will go on to serve their communities in health centers, hospitals, nursing homes, neighborhood pharmacies, and other endeavors.

Joseph R. Ofosu, Pharm.D., R.Ph.  
Dean of the School of Pharmacy
