

PLANNED PROGRAM OF STUDY

M.S. Biology or M.S. Biology (with Emerging Infectious Diseases Graduate Certificate)

Student Name: _____

Students must complete a minimum of 24 biology credits and 30 credits overall to satisfy the credit requirement of this program. Please list the courses you have interest in taking as part of this program below. Students may deviate from these specific courses at any time. A revised planned program of study listing the courses actually completed will be required during the application process of the comprehensive exam.

It is highly recommended that incoming students be academically or professionally experienced in cell biology and molecular genetics. Any students not well grounded in these areas should consider taking BIOL 510: Cell Biology prior to other courses in the program. BIOL 510: Cell Biology is also a prerequisite for many additional Biology courses.

Transfer Courses:

BIOL _____ 3 credits

BIOL _____ 3 credits
