

Dear USJ Community,

With the recent rise of positive COVID cases and our community's well-being in mind, USJ has partnered with [InterCommunity, Inc.](#) to offer COVID-19 vaccinations. It is not determined yet if the vaccinations will be administered on campus or at an off-campus location. If it is off campus, the University will provide transportation to residential students. This will probably occur before the end of April.

With the understanding that there is a limited supply of vaccines available through this agency, students, faculty, and staff who register for this option may still register independently for vaccinations through the VAMS system or with other vaccination providers.

To opt-in to receive information about scheduling an appointment, please complete the agency-required information in this [form](#).

If you have any questions, please send them to healthservices@usj.edu
