

UNIVERSITY OF SAINT JOSEPH

CONNECTICUT

Request for Proposals:

The University of Saint Joseph is seeking a proposal to support the planning and strategy associated with a federally grant funded construction and equipment project to renovate campus spaces to create and support the Inter-professional Health Education Center and the associated programming for training for in-person and remote patient care. The project will include renovation, upgrading HVAC systems, installation of a dedicated data circuit, construction of an underground conduit and purchase of equipment needed to simulate patient care. The Center will provide the opportunity for students to watch live-streamed simulations and have inter-professional discussions similar to a Grand Rounds model.

This project is fully funded by a federal grant and requires compliance with all federal regulations for procurement. Prior to beginning work USJ must clear conditions set by the Department of Health and Human Service, Health Resources and Services Administration related to a State Historic Preservation Office review (section 106 regulations) and lead/asbestos inspection and remediation (if needed).

The University is seeking assistance with plans for the classroom upgrade, navigation of the federally imposed conditions, finalization of scope details and any required town approvals.

Requests for an information session and high scope discussion to clarify that the work involved so you may determine if it is within your scope of service and interest should be submitted to the contact below no later than 9/16/2022:
