Please note: Every attempt has been made to ensure that the information contained in this manual is accurate at the time of publication. University of Saint Joseph reserves the right to correct errors or change policies, procedures, and requirements as necessary.
I join my fellow students today to pledge my commitment to the highest ideals and academic standards of my professional nursing education at The University of Saint Joseph. I recognize I am entering a profession in which I have responsibility for the lives of others. With that responsibility comes accountability for my actions. Therefore, as a representative of the department of Nursing, I pledge to adhere to the highest standard of honesty, integrity, accountability, confidentiality, and professionalism, in all my written work, spoken words, actions and interactions with patients, families, peers and faculty. I pledge to work together with my peers to support one another in the pursuit of excellence in our nursing education and to report unethical behavior. I will work to safeguard the health and welfare of patients who have placed their trust in me and will advocate for their best interest. I recognize that these responsibilities do not end with graduation but are a lifelong endeavor.

Undergraduate Student Handbook Signature Sheet ............................ 43
Dear Student:

As Chair of the Department of Nursing, I wish to welcome you to our Baccalaureate Nursing program. The Baccalaureate curriculum is designed to prepare graduates for a variety of emerging nursing roles and to meet patient health needs in a rapidly changing health care environment. Since our Department of Nursing offers three entrance tracks leading to a Bachelor of Science degree, this handbook has been prepared for use as a guide to each, including the Traditional Undergraduate track, Accelerated Second Degree track, and the RN to B.S. track. It also provides you with additional important information, such as grading, admission and progression policies, general departmental policies related to classroom and clinical requirements, and University policies related to academic integrity and student life. It contains the most current information about your program, and I know you will find it a valuable resource and guide throughout your nursing studies.

As you begin and progress through the Nursing Program, keep in mind the commitment required to achieve academic success. The program is challenging and requires full-time immersion in nursing knowledge and skills development. The use of good study habits, regular class attendance, participation in study groups, completion of reading assignments, content remediation, and meeting with and discussing your progress with your faculty advisor/mentor will help promote success in the program.

Also, as a nursing student, it is critical to be fully aware of the professional, ethical and moral responsibilities you are required to observe. The handbook will assist you in your orientation to these requirements. It is updated each academic year and may be updated more frequently as necessary. Students will be advised of any changes and are responsible for following all department policies and being aware of any changes that are made. You will need to read through it thoroughly and then sign the final page and return it to the nursing office.

Our Department of Nursing faculty and administration are committed to your success as a student, and we will do all we can to encourage you to do your best work in the program. This handbook will serve as a critical guide to your academic progression, but we are always available to meet with you personally to assist in any way we can. Please feel free to make an appointment to meet with any of us, including myself, at any time.

With best wishes for your success,

Janet Knecht, PhD., RN
Chair, Department of Nursing
School of Interdisciplinary Health and Science
University of Saint Joseph

About The Program

VISION
The Department of Nursing is an innovative center of nursing excellence which educates a diverse population across all levels of nursing practice. Graduates are prepared to lead the profession utilizing an evidence-based approach to reduce disparities and improve the health of persons, families, and communities.

MISSION
The mission of the Department of Nursing is to provide a rigorous professional education to a diverse population, built on a firm foundation in the liberal arts and sciences, that prepares students for leadership roles at all levels of nursing practice. The Department is committed to supporting holistic growth, fostering strong ethical values, providing an environment of equity and inclusion, promoting personal integrity, and preparing students committed to social justice.

PHILOSOPHY
The faculty of the USJ Department of Nursing believe that Nursing is a unique professional discipline with caring and competence at its core. The faculty believe that professional Nursing practice, at all levels, requires understanding of the self and adherence to strong moral and ethical values. We recognize the imperative to make sound health care judgments and the ability to take appropriate action, utilizing empiric, aesthetic, ethical, personal, and emancipatory knowing (Carper, 1978; Chinn & Kramar, 2019). We embrace a strong commitment to social justice, anti-racism, and mitigation of health disparities.

Further, the faculty believe that the art and science of nursing is operationalized through application of theoretical models, evidence-based practice, creative alternative approaches, patient advocacy, and caring interpersonal communication. The faculty offer educational programs that specifically challenge nursing students at all levels of practice to critique the status quo and act with moral courage to overcome social injustices, with the goal of attaining optimal human health and sustainable wellness for all.

The faculty consider Health to be a personally perceived state of well-being that consists of a dynamic interplay among the physiological, spiritual, psychological, social, cultural, and cognitive dimensions inherent in all people, in interaction with environmental factors. Patients are viewed as diverse individuals, families, communities, or global societies experiencing transitions related to their health needs (Meleis et al., 2012); nurses form partnerships with patients to develop plans of care that encourage healing transitions to promote and sustain health.

The faculty believe in supporting admission and retention of a student population that is diverse in race, religion, ethnicity, cultural background, and gender identity and orientation. We strive to create student-centered teaching and learning environments that encourage, inspire, and challenge each student to develop all aspects of their personhood. Such personal development enables students develop their own unique, self-reflective practice to create a foundation of human understanding that is grounded in compassion.

The faculty believe that practicing professional Nursing requires an education that adheres to standards of excellence and is firmly grounded in the natural and social sciences and liberal arts. Effective teaching and learning for nursing practice are realized and enhanced through reflective practice, and culturally sensitive education in an environment of inclusivity and mutual respect for all. Faculty collaborate with multidisciplinary scholars, care professionals, and students, to build a cohesive curriculum that considers the ever-evolving and expanding volume of health-related knowledge. Faculty endeavor to integrate and apply technology, responsive practice, and meaningful clinical experiences to engage students to develop strong critical thinking, sound clinical judgment, and consistent growth in clinical skills competency. In striving for overall educational excellence, the faculty holds itself continually accountable for ongoing evaluation and improvement in all aspects of curriculum content and process.

DON approved 9.26.22
Student nurses are expected to think and act professionally at all times to maintain a culture of dignity and safety for peers, faculty, and facility staff, and patients in all venues, including classroom, conference, and clinical settings. The faculty reserves the right to dismiss any student from the nursing major who demonstrates unsafe and/or inappropriate professional judgement or behavior. This includes but is not limited to conduct that is disruptive, aggressive, confrontational, abusive, attacking or belittling, socially or medically unacceptable or unethical in online or written messaging, in the classroom, laboratory, faculty office, and or clinical settings with peers, faculty, facility staff, and/or patients and their families. Such conduct is further identified in the ANA Code of Ethics, University of Saint Joseph Policies described in the Undergraduate Catalog, clinical agency policies, and the Joint Commission Sentinel Event Alert # 40 description.

**ANA Code of Ethics for Nurses**

1. The nurse practices with compassion and respect for the inherent dignity, worth, and unique attributes of every person.

2. The nurse’s primary commitment is to the patient, whether an individual, family, group, community or population.

3. The nurse promotes, advocates for, and protects the rights, health, and safety of the patient.

4. The nurse has authority, accountability, and responsibility for nursing practice; makes decisions; and takes action consistent with the obligation to promote health and to provide optimal care.

5. The nurse owes the same duties to self as to others, including the responsibility to promote health and safety, preserve wholeness of character and integrity, maintain competence, and continue personal and professional growth.

6. The nurse, through individual and collective effort, establishes, maintains, and improves the ethical environment of the work setting and conditions of employment that are conducive to safe, quality care.

7. The nurse, in all roles and settings, advances the profession through research and scholarly inquiry, professional standards development, and the generation of both nursing and health policy.

8. The nurse collaborates with other health professionals and the public to protect human rights, promote health diplomacy, and reduce health disparities.

9. The profession of nursing, collectively through its professional organizations, must articulate nursing values, maintain the integrity of the profession, and integrate principles of social justice into nursing and health policy.

Diversity, Health Equity, & Inclusion Statement

The Department of Nursing strives to foster an environment where similarities and differences are not only embraced and valued, but also celebrated. We acknowledge that institutional diversity is the cornerstone for advancement of knowledge, delivering of equitable care, and increasing access to care for all.

By working collaboratively with faculty, staff, students, and our community partners, the Department of Nursing at the University of Saint Joseph, strives to educate a culturally responsible and socially accountable healthcare workforce to meet the ever-evolving needs of the diverse populations we serve.

Civility Statement

By virtue of our practice and identification with professional nursing ethics and values, all faculty and students in The Department of Nursing are expected to adhere to the ethical provisions of the ANA Code of Ethics (American Nurses Association, 2015). These nine provisions, designed to ensure the highest levels of quality patient care, include specific guidelines and expectations for professional and inter-professional behavior. Several provisions speak directly to the kind of behaviors required of all nurses to establish and maintain a strong professional environment:

- Provision 1: Respect and support for human dignity and worth of every human being;
- Provision 4: accountability and responsibility for nursing judgments, decisions, and actions;
- Provision 5: duties to self and others for promotion of personal health, safety, and well-being;
- Provision 6: the mandate to establish, maintain, and improve the ethical environment of work settings;
- Provision 8: the obligation to collaborate with other health professionals for health, human rights, and health diplomacy;
- Provision 9: the mandate to promote social justice in nursing and health policy.

To ensure the ongoing maintenance of a strong professional environment within the Department of Nursing that affirms our professional ethics and values, all students are expected to conduct themselves in a civil manner and demonstrate respect for others in all academic and clinical settings. Civility is defined as always behaving respectfully, professionally and courteously in all written and verbal communications with fellow students, faculty and staff, patients and the public on campus and in clinical settings. The following guidelines will provide further direction:

Students demonstrate respect for peers and faculty by following these guidelines:

- Supporting the work of their colleagues
- Accepting constructive comments from an instructor, preceptor, or clinical agency personnel
- Discussing conflicts in a constructive manner
- Refraining from public criticism of others
- Refraining from using threatening or belligerent language
- Refraining from inciting others to engage in disruptive conduct or bullying behaviors.
10 Tips for Promoting Respect and Civility (Richmond, 2015)

1. **Focus on others’ needs and consider how your words and actions will impact others before you speak or act.**
   Approach each interaction with respect, regardless of whether you believe that the other person’s behaviors “earn” or even elicit that respect.

2. **Be intentional in your communications.**
   Plan to listen to the other person without interruption and practice effective listening skills. Develop an awareness of the respect that you display in all areas of your communications, including what you say, how you say it, your voice tone, and the body language that you demonstrate.

3. **Become a bridge builder and act in a manner that creates an inclusive work environment.**
   Look for various ways to have diversity in work teams and committees as well as in individual associations. Be aware of the downsides caused by labeling and stereotyping others. Replace these behaviors with respect for individual differences.

4. **Appreciate the value of diverse opinions in developing approaches to varying situations.**
   Recognize that it does not equate to agreement if you listen, clarify what was said, and ask questions to gain an understanding of others’ opinions. In situations where disagreement results, learn to “agree to disagree” respectfully.

5. **Understand that conflicts will occur in the workplace and take responsibility for your actions, regardless of the situation.**
   Take time to understand your triggers or “hot buttons.” Knowing what makes you angry and frustrated will enable you to manage your reactions and respond in a more appropriate manner. Practice self-restraint and focus on your overall objectives in responding to potential conflicts. A positive and solution-driven approach will facilitate your ability to reach resolution.

6. **Guard against acting impulsively based on negative assumptions about another’s intent, as that can lead to damaged relationships.**
   Take time to analyze relevant facts and to reconsider your assumptions.

7. **Avoid tendencies to become caught up in gossip, complaining, or other forms of negativity in day-to-day interactions.**
   Be mindful of the following quote by Ruth Anne Crouse, “What Peter tells me about Paul tells me more about Peter than it tells me about Paul.” Recognize that your actions will influence how others perceive you.

8. **View today’s difficult situations from a broader and more realistic perspective by considering what they mean relative to the overall scheme of things.**
   Ask yourself questions such as, “How will I look back on these circumstances in a week, month, or year?”

9. **Be supportive of your organization in your communications both inside and outside of the workplace.**
   Ensure that any comments that you make place the organization (including departments and individuals) in a positive yet realistic light.

10. **Pay attention to how respectful you are in your communications and other actions on an ongoing basis.**
Rate yourself (for instance, on a scale of 1-10) periodically after interactions to measure your success and to identify opportunities for improvement.

**Please note:** Demonstration of uncivil behavior on the part of any student constitutes a serious breach of nursing ethics, values, and professional expectations. Therefore, any such behavior will result in a written Notification of Needs Improvement (NNI). Failure to successfully resolve the NNI will result in failure of the course within which the incivility occurred.

References

**Undergraduate Program Outcomes**

1. Integrate the aesthetics and empirics of nursing with the natural/behavior sciences, the humanities, and inter-professional education to provide holistic care for individuals, families, groups, communities, and populations.

2. Demonstrate knowledge and skills in leadership that promote quality improvement and patient safety.

3. Implement an evidence-based and theoretically guided framework for nursing practice including the five patterns of knowing in nursing and transition theory.

4. Utilize data from diverse sources with knowledge and skill in informatics and patient care technology to promote safety and optimal patient outcomes.

5. Appraise and respond to the economic, legal, political, and social issues that impact health and wellness of individuals, families, groups, communities, and populations through emancipatory knowing.

6. Communicate and collaborate with other members of the health care team to advocate for high quality and safe patient care.

7. Deliver culturally appropriate nursing care through health promotion and disease prevention to populations on a local and global level.

8. Assume responsibility and accountability for ethical professional behavior and nursing care.

9. Demonstrate competent nursing practice in diverse settings caring for individuals, families, groups, communities, and populations.

*DON approved 9.26.22*
American Association of Colleges of Nursing (AACN) Essentials

The AACN Essentials outlines required components of nursing curriculum, used to define quality nursing education. The University of Saint Joseph nursing curriculum is based on these essentials.

Domain 1: Knowledge for Nursing Practice
Descriptor: Integration, translation, and application of established and evolving disciplinary nursing knowledge and ways of knowing, as well as knowledge from other disciplines, including a foundation in liberal arts and natural and social sciences. This distinguishes the practice of professional nursing and forms the basis for clinical judgment and innovation in nursing practice.

Domain 2: Person-Centered Care
Descriptor: Person-centered care focuses on the individual within multiple complicated contexts, including family and/or important others. Person-centered care is holistic, individualized, just, respectful, compassionate, coordinated, evidence-based, and developmentally appropriate. Person-centered care builds on a scientific body of knowledge that guides nursing practice regardless of specialty or functional area.

Domain 3: Population Health
Descriptor: Population health spans the healthcare delivery continuum from public health prevention to disease management of populations and describes collaborative activities with both traditional and non-traditional partnerships from affected communities, public health, industry, academia, health care, local government entities, and others for the improvement of equitable population health outcomes.

Domain 4: Scholarship for Nursing Practice
Descriptor: The generation, synthesis, translation, application, and dissemination of nursing knowledge to improve health and transform health care.

Domain 5: Quality and Safety
Descriptor: Employment of established and emerging principles of safety and improvement science. Quality and safety, as core values of nursing practice, enhance quality and minimize risk of harm to patients and providers through both system effectiveness and individual performance.
Domain 6: Interprofessional Partnerships
Descriptor: Intentional collaboration across professions and with care team members, patients, families, communities, and other stakeholders to optimize care, enhance the healthcare experience, and strengthen outcomes.

Domain 7: Systems-Based Practice
Descriptor: Responding to and leading within complex systems of health care. Nurses effectively and proactively coordinate resources to provide safe, quality, equitable care to diverse populations.

Domain 8: Information and Healthcare Technologies
Descriptor: Information and communication technologies and informatics processes are used to provide care, gather data, form information to drive decision making, and support professionals as they expand knowledge and wisdom for practice. Informatics processes and technologies are used to manage and improve the delivery of safe, high-quality, and efficient healthcare services in accordance with best practice and professional and regulatory standards.

Domain 9: Professionalism
Descriptor: Formation and cultivation of a sustainable professional nursing identity, accountability, perspective, collaborative disposition, and comportment that reflects nursing’s characteristics and values.

Domain 10: Personal, Professional, and Leadership Development
Descriptor: Participation in activities and self-reflection that foster personal health, resilience, and well-being, lifelong learning, and support the acquisition of nursing expertise and assertion of leadership.
Accelerated Second Bachelor’s Degree (ASD) in Nursing Program

A major in nursing requires the completion of all nursing academic requirements, including a passing score on a comprehensive exam and a minimum of 53 credits. Graduates will be eligible to apply to take the National Council Licensing Examination for licensure as a Registered Nurse.

### Policies for all Undergraduate Nursing Majors

**Class Attendance Policy**

Absence from class jeopardizes a student’s success in the program. Students may be excused from class by notifying the Professor ahead of time. Two unexcused absences from class will result in a Notification of Needs Improvement (NNI). Failure to successfully resolve the NNI may result in failure of the course.
**Student Athlete Policy**

- Student athletes will be required to report all practice schedules and game schedules to the UG Director of Clinical Experiences prior to the start of the semester.

- All changes to the sports schedule or additions of practices and/or games must also be reported immediately to the UG Director of Clinical Experiences.

- All effort will be made to accommodate student athletes' schedules around clinical. In some instances, this may not be possible, however the student athlete and coach will be made aware prior to the start of clinical.

- At the start of each semester the student athlete must notify the course instructor of any class days that will be missed due to travel/games. The student should also remind faculty of upcoming sports-related absences several days prior to class.

- It is the responsibility of the student to make up any missed assignments or exams.

- If the student athlete needs to miss clinical because of a game the student must notify the UG Director of Clinical Experiences, the course faculty, and the clinical adjunct.

- Any absences related to a game will be considered excused.

- If a student athlete either misses a clinical day or must leave clinical prior to completing six hours, the clinical day will need to be made up.

**Mandatory Events**

The Department of Nursing coordinates events throughout the academic year that are part of professional development and therefore **mandatory** for nursing students to attend. These events are:

1. **Symposium Day**: This annual day-long event is held in April. Juniors, Seniors, and Accelerated Second Degree students are all required to attend the full day of events.
2. **Nightingale Lecture**: This annual event is held in April and all students are required to attend.

**Please note**: If the student fails to attend Symposium Day or the Nightingale Lecture, there will be a written assignment required related to fulfilling the professional standards of nursing.

3. **NCLEX Live or Online Review courses**: Seniors and ASD students who will graduate are required to attend. Dates will be published one year in advance and students should refrain from scheduling personal events during these courses.
4. Other events as developed.

Excused absences include:

- USJ team sporting event
- Required class offered by another department at USJ
- Absences due to illness with a note from a primary care provider

*DON approved 9.26.22*
**Chain of Command**

Students and faculty are expected to work together in a constructive and collaborative manner. Should you encounter an issue in either your academic or clinical course, there are people who can support you. It is usually beneficial to first address the issue with the individuals involved and to follow the Civility Policy. However, should it be necessary to discuss the issue further, this is the chain of command. Please note. It is not appropriate to contact the administrators of our clinical partners in order to arrange clinical placements.

**Examinations**

To facilitate academic integrity and student ethical behavior, the following policy is to be followed for all examinations in the department of Nursing:

- All students must arrive on time for testing.
- All belongings should be placed in the front of the room.
- All smart watches (Apple, Samsung, Fitbit, etc.) must be removed and stored in the front of the room prior to starting an exam.
- Faculty will supply any scrap paper used and it will be returned at the end of the exam.
- No electronic equipment including cell phones and PDAs. At the faculty discretion, basic calculators and laptop computers may be utilized for testing may be acceptable.
- No hats, caps, jackets, or overcoats will be worn.
- All exams are considered secure and are not released to students.
- No exam will be reviewed except in the presence of the faculty.
- During exam reviews, all of the above apply.
- Students must notify the instructor in advance if they will be absent due to illness or emergency.
- Students who have formally documented accommodations for testing must notify the instructor prior to the testing date.
- Students are not permitted to speak to one another during testing.

Review of unit exams and quizzes are scheduled and conducted in the manner of exams. The following procedures will be enforced in all situations in which students are given the opportunity to review an exam.

A. Students are not permitted to copy any materials, take notes or pictures or in any other way record during test review.
B. No personal belongings, including writing instruments, shall be on the desk during review.
**Missed Examinations**

Quizzes and examinations must be taken at the assigned time on the course syllabus. Make-up examinations are administered at the discretion of the course faculty and may be different in format from the original examination administered to their peers.

**Grading**

- Grading in the Department of Nursing follows the university policy articulated in the Student Handbook for the university and the university catalog.
- Final course grades will be rounded up to the nearest whole number if the tenth decimal place is .5-.9.
- No GPA will be rounded under any circumstances.

**Incomplete Grades and Extensions, and Grade Appeals**

The University policies on Incomplete Grades and Extensions, and Grade Appeals can be found on the Academic Policies and Procedures page located at: [http://catalog.usj.edu/content.php?catoid=13&navoid=680](http://catalog.usj.edu/content.php?catoid=13&navoid=680)

**Academic Grievance Policy**

Academic grievances are discussed in the Student Handbook of the University of Saint Joseph, which can be found on the Student Resources page at: [https://my.usj.edu/ICS/Student/Student_Resources_Page.jnz](https://my.usj.edu/ICS/Student/Student_Resources_Page.jnz).

**Notification of Needs Improvement (NNI)**

Refer to Appendix A for the Notification of Needs Improvement Form. Reasons for receiving a Notification of Needs Improvement can be academic, clinical, and behavior-related in nature. Refer to the sections in the Handbook: Student Conduct in the Clinical Setting, Confidentiality and Fiction Agreement for the Nursing Learning Center.

A faculty member may give a student a Notification of Needs Improvement at any time during the semester. The intent of the Notification of Needs Improvement is to communicate the need for and identify a plan of remediation and improvement. Due dates for completion of remediation activities will be agreed upon by the faculty and the student. Documentation of completion will be the

DON approved 9.26.22
responsibility of the student and the method of documentation will be agreed upon by the Faculty and the Student.

**Clinical adjunct faculty should complete the NNI in consultation with the Course Lead Faculty and keep the Program Director and Clinical Coordinator informed.** The faculty will ensure completion of the Notification of Needs Improvement form with plan for remediation.

Failure to successfully complete the remediation plan will result in failure of the course.

**Math Proficiency Requirement**
Medication math content is taught in N219 of the traditional program and N220 of the ASD Program. A medication math exam is administered at the beginning of each clinical course (318, 319, 321, 323, 412, 414, 417, and 419) to ensure proficiency and demonstrate that they are adequately prepared to provide safe care to patients. Coordination of the math proficiency requirement is the responsibility of the faculty teaching clinical courses.

Students must earn 90% or above on the math exams administered in the Junior and Senior clinical courses. In general, these exams will be administered during the first week of class and students should come to the class prepared to take the exam.

Students will not be allowed to prepare or administer medications in the clinical setting until they attain the required 90% on the test. This may affect their clinical grade, and their standing in the Department of Nursing.

Students who fail to earn 90% on the exam will be required to attend a remediation class and retake the exam within 1 week of completing remediation.

**Failure to earn a 90% or above on the second exam will result in failure of the course. The first course failure due to failure on the math exam may be repeated unless the student has prior course failures. The second course failure for any reason, including failure on the math exam, result in dismissal from the program.**

**Academic Integrity**
It is the policy of the University of Saint Joseph that all members of the community act honestly. By enrolling in or working at the University, all members implicitly agree to uphold the University’s policy of Academic Integrity (AI). This means that all work that is presented to satisfy course requirements be the result of your original scholarly efforts that ultimately improves student skills and knowledge and places value on the USJ degree. Should you cheat or plagiarize an AI report will be filed with the Academic Integrity Office and sanctions could range from a reduced grade on the assignment to an F for the course or in extreme cases suspension or expulsion. Review the AI policy located on MyUSJ (my.usj.edu) at: [https://my.usj.edu/ICS/Student/Academic_Integrity_Office/Handouts.jnz](https://my.usj.edu/ICS/Student/Academic_Integrity_Office/Handouts.jnz)

DON approved 9.26.22
USJ Comprehensive Final Examination

The USJ Comprehensive Examination is a university-wide requirement for all undergraduate graduating seniors and is given to determine basic competence in their area of study. Nursing students do not meet this graduation requirement until they have successfully completed the ATI Comprehensive Predictor Exam and remediation. If the students earn benchmark on the first attempt and have remediated, they have successfully met the requirements of the USJ Comprehensive Exam. If the benchmark has not been met, a second exam with remediation will be required before graduation in order to meet the USJ Comprehensive Exam requirement. If they have still not met the benchmark a third exam will be strongly encouraged to be scheduled after graduation.

Student Compliance with the Health Insurance Portability and Accountability Act (HIPAA)

According to the regulations of HIPAA, nursing students are permitted to have access to Protected Health Information (PHI) when observing and performing direct patient/client care as part of their learning activities. As such, they must follow approved HIPAA policies on the usage of PHI. Students must comply with requirements and expectations for appropriate storage and transmission of patient information. No PHI can leave a covered entity site unless it is de-identified.

To de-identify information HIPAA requires the removal of all of the following identifiers:

- Names or initials
- Geographic subdivisions smaller than a state, e.g., county, city, Indian Reservation. In certain circumstances, the first 3 digits of a zip code can be used.
- All elements of dates (except year) directly related to an individual
- All ages or dates indicating an age over 89 (they can be lumped into one category of 90 or older)
- Telephone numbers
- Fax numbers
- Social security number
- Medical record numbers
- Health plan beneficiary numbers
- Account numbers
- Certificate/license numbers
- Vehicle identifiers and serial numbers
- Web universal resource locators (URLs)
- Internet Protocol (IP) address numbers
- Biometric identifiers, including finger and voice prints
- Full face photographic images and any comparable images
- Any other unique identifying number, characteristic or code
Clinical Policies

Clinical Experiences and Assignments
Clinical experiences are designed to complement and integrate classroom content. They assist the student in obtaining the necessary psychomotor and application skills to achieve basic proficiency to practice as a nurse upon graduation.

The department of Nursing has contractual relationships with agencies that state the number of clinical hours and attest to the competence of the students practicing in their facilities. The State Board of Nurse Examiners requires that students have a minimal number of clinical hours in order to take the NCLEX. Often, important information affecting patient care is communicated to students at the start of clinical experiences. Therefore, tardiness for clinical/lab or simulation experiences jeopardizes the student’s ability to provide safe nursing care. Additionally, time management is a necessary professional skill, and punctuality is expected in professional workplaces. Missed hours can prevent adequate development and assessment of the required knowledge, skills, attitudes and clinical judgment. Absence from clinical/lab can jeopardize the student’s ability to successfully meet the required clinical course outcomes.

Students are expected to read the Nursing Student Agreement for Clinical Experiences (Appendix B) and initial the Signature Page at the end of the handbook. Students should make note of the following regarding clinical experiences:

1. Clinical experiences may be scheduled on any day of the week, including Saturday or Sunday, between the hours of 7 am to 11 pm. Clinical experiences will be scheduled within the state and up to 1 hour away from campus.
2. Students are not allowed to work 8 hours prior to the start of a clinical shift.
3. Students are not allowed to contact the administrators of our clinical partners in order to arrange clinical placements.
4. Work schedules and family obligations will NOT be taken into consideration when clinical placements are assigned.
5. There will be NO CHANGES made to the clinical placements after the final schedule is issued.
6. Students are required to provide their own consistent, reliable transportation to all supervised clinical experiences.
7. Attendance at all clinical placements days is required. Clinical absence places the student in jeopardy of failing the course.
8. In the event a student anticipates missing a clinical day the student must notify the clinical instructor, clinical agency, undergraduate clinical coordinator and course coordinator BEFORE the clinical shift begins.
9. Clinical absences must be made up per the guidelines below.
10. Students should be well-rested and nourished for clinical.
11. Students should arrive at clinical on time, professionally dressed and groomed according to the guidelines below, and prepared for patient care with the necessary equipment.
12. Cellphone or smart-watch communication is not allowed during clinical experiences unless students are researching patient care information.
13. Failure in professional behaviors will result in failure in the clinical experience. Failure in the clinical experience will result in dismissal from the program if this is the student’s second Nursing course with an earned grade of B- or less.

CastleBranch Profile/CB Bridges

Castle Branch, Criminal Background Check, Drug Screening. All students purchase a package through a vendor called Castle Branch that includes a Criminal Background Check (CBI), drug screen and document and immunization tracker. The total cost of $127 covers the cost of the CBI ($59.00), the drug screening ($48.00) and the document and immunization record tracker ($20.00). The drug screening can be done at any Quest Lab location. It is the students’ responsibility to go to https://portal.castlebranch.com/uw79 and purchase a CBI with a credit card or money order. The CBI may need to be updated throughout the program. A letter will be sent to each student accepted into the major with instructions.

All Student Nurses must have a complete background check run prior to the first day of class for NURS 219/220. The background check will be part of the CastleBranch package that the student will purchase.

The following is included in the CastleBranch background screen:
- 7-year County Criminal Search
- Current, Maiden, and Alias Names Nationwide
- Healthcare Fraud & Abuse Scan
- Nationwide Federal Criminal Record
- Nationwide Record Indicator with Sex Offender Index
- Social Security Alert
- Residency History

Any student with an open felony case, closed felony case, open misdemeanor case or recorded history of healthcare fraud or abuse should be aware that this information must be shared with the agency to which the student is assigned for clinical. Also, any student listed on the Sex Offender registry will be shared with the clinical agency. The decision to accept the student into the agency for clinical is dependent on the specific agency’s policy regarding criminal history. Most of the clinical agencies will not accept a nursing student with a criminal record.

Students should be aware that if the department of Nursing is unable to secure a clinical placement because of a past criminal record the student will be unable to progress in the Nursing major and will be dismissed from the program.
Closed misdemeanor charges do not require reporting to the clinical agency for approval prior to placement.

Confidentiality of the information from the background check will be maintained consistent within FERPA (Family Educational Rights and Privacy Act) guidelines.

**A negative drug screen is required for all undergraduate Nursing students prior to entering the clinical phase of the Nursing program.** The drug screen must be completed prior to the first day of class for NURS 219/220. CastleBranch will create the lab requisition for an 11-panel drug screen once the package is purchased. The drug screen can be done at any Quest Lab. A secure report will then be available to the Director of Clinical Experiences.

Any student with a positive drug screen will undergo a medical review through CastleBranch. The medical reviewer will reach out to the student to see if there is a current prescription for the drug that tested positive. If the medical reviewer is satisfied with the prescription provided, the drug screen will be reported as negative.

If the student does not have a prescription for the drug, he/she/they should be aware that this information must be shared with the clinical agency to which the student is assigned. The decision to accept the student into the agency is dependent on the specific agency’s policy. Students should be aware that if the department of Nursing is unable to secure a clinical placement because of a positive drug screen without a proper prescription, the student will be unable to progress in the Nursing major and will be dismissed from the program.

Students are not permitted to be under the influence of any drug, legal or illegal, while participating in any clinical activity. If the student is suspected of being under the influence, he/she/they will be required to repeat the drug test at their cost. The student will not be able to participate in clinical until the results of the drug test are complete.

The drug screen tests for the following:

- Amphetamines
- Methamphetamines
- MDMA Ecstasy
- Barbiturates
- Methadone
- Cocaine
- Benzodiazepines
- Opiates
- Phencyclidine
- Cannabinoids
- Oxycodone

Confidentiality of the information from the drug screen will be maintained consistent within FERPA (Family Educational Rights and Privacy Act) guidelines.

Certain placements require CBIs to be obtained within 45 days of the beginning of the clinical experience. Students that attend such placements will have to repeat the CBI and will be given a code to order the repeat CBI package with an additional cost of $59.

**Immunization Tracker.** Students will be required to complete the immunization tracker and physical exam by the seventh week of the semester during NURS 200 (or 2.5 weeks into the semester for NURS 201).
**Additional Requirements from Clinical Partners.** There are several clinical partners that require completion of additional packets that will be assigned to students through their CastleBranch Profile/CB Bridges account. The ProTracker tool will be $10.

**Fingerprinting.** There may be clinical placements that require state and federal fingerprinting to be obtained prior to the beginning of the clinical rotation. Students that attend such placements will be given a code to order the fingerprint package through CastleBranch for an additional fee of $127.

**Nursing Department Documents**
Students will be required to read this Handbook in its entirety including the documents in the Appendices and complete the signature sheet at the end. The signature sheet will be signed annually and uploaded to Castle Branch.

An American Heart Association Basic Life Support (AHA/BLS) card and Health Insurance information will also be uploaded to Castle Branch annually.

- **Health Insurance:** Every January, upload a copy of your current health insurance card (both front and back of card) OR proof of coverage to Certified Background. **If the name on the card does NOT match the student’s name, verification of coverage from the insurance company is required. Monthly issued insurance is NOT acceptable.**

**Portrait Pictures.** Students will be required to upload a picture of themselves to Castle Branch. The requirements for the picture are as follows:

- Submit a color photo
- Use a clear image of your face. Do not use filters commonly used on social media.
- Have someone else take your photo. No selfies.
- You can wear your glasses
- Use a plain white or off-white background. Stand against a light-colored wall.
- Submit a high-resolution photo that is not blurry, grainy, or pixelated.
- Do not digitally change the photo
- Wear plain clothes not your USJ uniform
- No sunglasses or head coverings. If you wear a head covering for religious purposes that is allowed.
- You cannot wear headphones or wireless hands-free devices.
- The picture must be from the shoulders up.

**Occupational Safety and Health Administration Exam.** Students will be required to take an Occupational Safety and Health Administration online exam provided by the Connecticut Hospital Association. The students will be required to complete a posttest and upload the certificate to CastleBranch. This is a one-time requirement and will be done by the seventh week of the semester during NURS 200 (or 2.5 weeks into the semester for NURS 201).
Health Services and Immunization Requirements. Any student with a latex allergy is required to notify the faculty each semester and provide documentation from a health care professional (MD, APRN, PA) clearing the student for clinical and allowing the student to work in the Nursing Learning Center (which is NOT latex free).

All the following documentation is to be uploaded to Castle Branch Immunization Tracker at least 3 weeks prior to starting clinical or class at https://portal.castlebranch.com/uw79 Students are responsible for maintaining current documents throughout each clinical semester. All nursing students in clinical courses are required to have the following completed and documented in the Health Services department at least three weeks before the beginning of each semester.

1. **Physical examination** upon admission and updated every two years unless required annually by a clinical agency.
2. **COVID -19**
   - There must be documentation of full vaccination including the required number of boosters as defined by the current university and agency policies.
3. **Hepatitis B**
   - There must be documentation of one of the following:
     - 3 vaccinations or completion of the vaccine declination form.
     - Positive antibody titer (lab report required)
4. **Influenza**
   - Submit documentation of a flu shot administered during the current flu season on a date determined by the department in compliance with agency protocols.
5. **Tetanus, Diphtheria & Pertussis (Tdap)**
   - There must be documentation of a Tdap booster within the past 10 years OR a Td booster within the past 2 years.
6. **Varicella (Chicken Pox)**
   - There must be documentation of one of the following:
     - 2 vaccinations
     - Positive antibody titer (lab report required)
7. **Measles (Rubeola)**
   - There must be documentation of one of the following:
     - 2 vaccinations
     - Positive antibody titer (lab report required) for Measles (Rubeola)
8. **Mumps**
   - There must be documentation of one of the following:
     - 2 vaccinations
     - Positive antibody titer (lab report required) for Mumps
9. **Rubella**
   - There must be documentation of one of the following:
     - 2 vaccinations
     - Positive antibody titer (lab report required) for Rubella
10. **TB Skin Test**
    - There must be documentation of one of the following:
      - 2 step TB Skin test (1-3 weeks apart)
      - Past 2 Step TB Skin test PLUS all subsequent annuals
      - QuantiFERON Gold Blood Test (lab report required)
• If positive results, provide a clear Chest X-Ray (lab report required) AND the annual Tuberculosis Risk/Symptom Inventory form
• Annual TB testing is required either through a PPD, QuantiFERON Gold blood test or completion of an annual Tuberculosis Risk/Symptom Inventory.

**Student Illness during Clinical/Medical Leave of Absence**

If a nursing student is ill or infectious, the student must notify the clinical faculty, the clinical agency, and the Undergraduate Clinical Coordinator prior to the expected absence at the clinical site. In the event the student arrives at the clinical site ill or infectious, the clinical faculty will determine whether the student should be excused from clinical activities and sent home.

Students who become ill or physically injured (excluding exposure to bodily fluids) during clinical activities are responsible for obtaining their own medical care. In an emergency, care will be provided by the clinical agency and any cost of emergency care will be the responsibility of the student.

Any student with an existing health problem that has the potential of affecting the student’s ability to perform his/her student activities or which may compromise his/her health and safety, or the health and safety of patients, should discuss the health problem with the Student Accessibility Coordinator prior to the first day of clinical. Please visit the Student Accessibility Services page on MyUSJ for information about initiating services.

Students with more serious health issues may require a medical leave of absence. Please discuss with the Undergraduate Clinical Coordinator and Undergraduate Program Director. Proper forms need to be completed along with documentation from health care provider.

**Blood-borne Pathogen/Needle Stick Exposure Protocol**

Upon the occurrence of a needle stick at a clinical site, the student and faculty will follow the protocol outlined in Appendix C—clean the site, report to the Emergency Room and use the insurance information provided in the protocol. A University of Saint Joseph Injury Report should be completed and submitted to Student Health Services.

**CPR Certification**

CPR training/certification in BLS for Providers is required of all nursing students prior to participation at Clinical sites.

• CPR certification must remain current throughout the entire nursing program.
• There must be documentation of training from an American Heart Association Healthcare Provider course. No other courses will be accepted and failure to complete this requirement will prevent a student from clinical participation.
• Certificate MUST be good for two years. Copy must be front and back of the card & card must be signed.

**Technical Standards**

Technical standards are all the nonacademic functional abilities essential for the delivery of safe, effective nursing care. The ability to meet the technical standards is a required component of
satisfactory progression through the nursing program and is necessary to meet the clinical competencies established in specific courses. Please read the Technical Standards (Appendix D) and initial the Signature Sheet at the end of the handbook.

**Student Conduct in the Clinical Setting**

Every student is fully responsible for his/her conduct in the clinical setting. Students are expected to always exhibit personal and academic integrity and safe clinical behaviors. There is zero tolerance for conduct violations. A student who demonstrates inappropriate conduct will be required to leave the clinical setting. Students will be subject to disciplinary action, including but not limited to probation, course failure, suspension, or dismissal.

Patient safety is of primary importance. Students should seek guidance from the clinical instructor and primary nurse to maintain patient safety. Errors (commission or omission) in the clinical area must be reported and discussed with the clinical instructor and primary nurse immediately. Students should also be aware that the Course Coordinator and the Undergraduate Program Director will be notified.

Inappropriate and unsafe clinical performance are defined as deficiencies in knowledge, skills and/or attitude that violates the procedures or policies of the department of Nursing of the assigned agency.

**Examples of unacceptable behaviors may include but are not limited to:**

- Falsifying attendance records (signing in for another)
- Profanity, vulgarity, disrespect, or rudeness to patients, visitors, faculty, students, or staff.
- Destruction of equipment or property.
- Patient abandonment
- Negligence
- Unsafe practice
- Incompetence and/or lack of knowledge or previously learned skills.
- Breaches in confidentiality as defined by HIPPA
- Concealing one’s error or those of another.
- Falsification of data in patient records.
- Omission of relevant data from patient records.
- Verbal or physical abuse of a patient, visitor, faculty, staff or peer.
- Violation of the Drug and Alcohol Policy
- Violation of scope of practice

It is the responsibility of all students to report any violations.

**Clinical Evaluation and Professional Behaviors**

Students are evaluated in clinical according to the competencies outlined for each clinical course in the Clinical Evaluation Tool, including professional behaviors.
In order to successfully pass clinical, students must attain a minimum score of 2 for each competency and a pass for all of the professional behaviors. Professional behaviors are intended to demonstrate that the student “accepts responsibility for professional practice” and include the following:
1. Adequately prepares in advance to provide knowledgeable care to patients.
2. Seeks new learning experiences.
3. Requests guidance as necessary.
4. Demonstrates growth with feedback.
5. Reports changes in patient’s status in a timely manner.
6. Completes activities in a timely manner.
7. Organizes and prioritizes patient care in a safe manner.
8. Maintains confidentiality.
9. Reports absences to the clinical site.
10. Is punctual.
11. Completes written assignments on time.
12. Demonstrates respect for staff and colleagues.
13. Dresses and grooms in a manner that demands professional respect.
15. Identifies and evaluates strengths and areas for improvement.

Please note. Professional behavior is expected in the academic setting in addition to the clinical setting.

If at mid-term a student receives a Needs Improvement in professional behaviors an NNI form will be completed. At all other times during the semester, the policy outlined on the NNI will apply.

Clinical Make-up Requirements
All missed clinical time must be made up according to the guidelines below:

1. The first missed clinical day will be made up during the scheduled makeup week or through a clinical experience arranged by the clinical faculty which may be on a different day and at a different location.
2. Students must complete a minimum of 6 hours of the clinical day. If less than 6 hours are completed the student will be required to do a make-up clinical.
3. The second missed clinical day will be made up through a single intraprofessional clinical experience. You must reserve the date and time stipulated on the course syllabus and communicated to you by the course faculty in the event that you have an illness during the semester. The makeup may be at a different location and on a different day than the assigned clinical day.
4. Three or more missed clinical days will prompt a review by a committee including the Director of the pre-licensure nursing programs, Chair of the department of Nursing, Academic advisor, Clinical faculty, the Undergraduate Clinical Coordinator and/or the Course Lead Faculty.
5. Any student requiring extended medical leave at any point during a clinical course that requires clinical absence must seek accommodations from the Accessibilities Services Office.
6. Any student who requires clinical make up following completion of the course will receive an incomplete in the course with the missed clinical time and may incur an additional fee to pay clinical faculty in order to complete these clinical hours.

DON approved 9.26.22
**Uniforms**

As a student in the University of Saint Joseph Department of Nursing, the expectations regarding your behavior and dress require a high professional standard.

The required uniform for USJ nursing students consists of:

- A white scrub top with a University of Saint Joseph patch on the left sleeve and is embroidered with your name on the front. Nicknames are not allowed.
- Navy blue scrub pants.
- White socks/stockings.
- A plain white (no other color) long sleeve shirt may be worn under the white scrub top.
- White shoes or athletic shoes that are completely white (no patterns, color trim or brand logo). Sling-back or open-back clogs are not permitted.
- Navy blue scrub jackets are optional but must have the University of Saint Joseph patch on the left sleeve and embroidered student name on the front.
- Uniforms must be ordered through the Scrub Warehouse website or store (2409 Main St., Rocky Hill, CT 06067, 860-571-8966) [http://webstore.scrubwearhouse.net/GroupLogin](http://webstore.scrubwearhouse.net/GroupLogin) group code NURSING2018
- Uniforms are to be clean and pressed and have University patches attached.
- Visible name identification with a photo ID is to be worn at all times while in any clinical setting.
- Uniforms are to be worn while in any clinical setting, including the Nursing Learning Center at the discretion of the faculty and lab Director.

**Grooming: Acceptable grooming consists of the following:**

For the purposes of infection control:

- Hair must be worn away from the face and not touch the collar.
- The only jewelry allowed are watches, a wedding band, and medical alert bracelets.
- Fingernails must be short and non-natural nails are not permitted. No nail polish is acceptable.
- Male students with facial hair must be clean shaven in accordance with hospital policy on N95 masks and fit testing.

Additional items such as:

- Tongue rings, facial jewelry, stud earrings and ear gauges may be worn if they are allowed by the clinical site in which the clinical rotation is done.
- Tattoos may remain visible if they are allowed by the clinical site in which the clinical rotation is done and are in accordance with the USJ Department of Nursing Civility Statement.

Students are required to adhere to this dress code while in clinical and in the Nursing lab unless a specific dress or a standard above this dress code specifically supersedes this policy.

*DON approved 9.26.22*
Any medical condition or religious belief that inhibits adherence to the Department of Nursing Uniform policy should be discussed with the undergraduate clinical coordinator.

Students not adhering to the USJ Department of Nursing uniform policy may be dismissed from clinical/lab.

**Equipment requirements are as follows:**
- You must purchase the appropriate equipment which includes a stethoscope and blood pressure cuff. The vendor, MDF Instruments, works with USJ to make certain you have the appropriate equipment. It is an investment, and you MUST order from MDF to ensure that you have the proper items. Stethoscope must have a “bell” and “flat” diaphragm capabilities. The link to our customized site with special pricing and an option for the USJ logo is as follows. It must be copied and pasted into your browser: [https://www.mdfinstruments.com/edu/saintjoseph?coupon=saintjoseph](https://www.mdfinstruments.com/edu/saintjoseph?coupon=saintjoseph)
- Watch with a second hand.
- Other equipment may be suggested by clinical faculty for use in particular clinical areas.
Prelicensure Program Progression and Dismissal Policies

Criteria for Progression in the Nursing Major

*Students are allowed to progress in the Nursing Program under the following criteria:*

**Science courses:**
All grades in required science courses must be a B- or higher with the following exceptions:

- Students may earn one C+ in a science course and progress without repeating the course.
  
  OR

- Students may earn one grade below a C+ in a science course and will be eligible to repeat the course.

- Only one grade below a B- in a science course will be allowed. A second grade in a science course below a B- will result in dismissal from the nursing program.

**Nursing Courses:**
All grades in required nursing courses must be a B- or higher with the following exceptions:

- Students may earn one C+ in a nursing course and progress without repeating the course.
  
  OR

- Students may earn one grade below a C+ in a nursing course and will be eligible to repeat the course.

- Only one grade below a B- in a nursing course will be allowed. A second grade in a nursing course below a B- will result in dismissal from the nursing program.

**All Students:**

- A student is allowed to withdraw only from one nursing and one science course for academic reasons only. Withdrawals for non-academic reasons will be considered on a case-by-case basis.

- Pre-requisite science courses that are transferred to USJ are subject to the same grade, repeat, and withdrawal policies as outlined above.

In addition to the above guidelines, students will be **dismissed** from the program under the following additional circumstances:

- Failure to successfully remediate a Notification of Needs Improvement within the semester it is received.
- Failure to pass the clinical experience will result in failure of the course, despite the grade earned for the classroom content.
- Failure to pass a clinical experience will also result in dismissal from the program if this is the student's second nursing course with an earned grade of C+ or less.

A student has the right to appeal a progression/dismissal decision. If a student wishes to make an appeal, he/she must write a statement supporting the reasons for being granted an appeal of progression and submit this, along with any other supporting documentation to the Department Chair, Dr. Knecht jknecht@usj.edu, no later the five days after the final grade has

*DON approved 9.26.22*
Once dismissed from the nursing major, a student cannot apply for and will not be admitted or reinstated into any USJ pre-licensure nursing program.

Any student who withdraws from a Nursing course will be required to meet with his/her faculty advisor.

Student Support Services

Student Records

It is important to the department of Nursing and the university to monitor student outcomes throughout the program. This is one aspect of program evaluation. Nursing faculty will be reviewing student data available to the Nursing department and analyzing for trends that can inform program improvements. The information will be used internally by the department and university in summary form. Students will not be identified individually outside of the university. Anonymous descriptive information may also be shared with organizations that evaluate the program such as the Connecticut State Board of Examiners for Nursing, or the accrediting body of the Commission on Collegiate Nursing Education (CCNE).

Student Accessibility Services

The University of Saint Joseph is committed to providing equal educational opportunity and full participation for individuals with disabilities. Student Accessibility Services at USJ facilitates the reduction or elimination of disability-related barriers encountered by students with documented permanent and temporary disabilities such as ADHD, ASD, learning disabilities, psychological disabilities, deafness and hearing loss, blindness and vision loss, and physical disabilities. Please visit the Student Accessibility Services page on MyUSJ for information about initiating services.

Center for Academic Excellence (CAE)

Students are strongly encouraged to make appointments at the Center for Academic Excellence (CAE) to work with the staff and student tutors who can help students learn in a way that is most effective for them. A variety of support is available at the CAE including individual tutoring, small group work and study tables. More information about the CAE will be shared with students at the beginning of each semester. For more information, call 860-231-5514 or go to the website at https://www.usj.edu/academics/academic-services/student-academic-career-services-center/for-academic-excellence/.
Office of Information Technology (OIT)

Assistance with technology issues can be addressed by calling 860-231-5310 or by placing a work ticket at myIT:  https://usj.teamdynamix.com/TDClient/1899/Portal/Home/

Office of Diversity and Inclusion

The Office of Diversity and Inclusion/Title IX is responsible for programming and educational events for the campus community with the goal of promoting respect, consent and inclusivity. This office also responds to complaints of discrimination. If you have a concern, please contact the Director of the Office of Diversity and Inclusion/Title IX. The office collaborates across the University to ensure inclusive programming, and a welcoming environment for students, faculty and staff. The safety and well-being of faculty, staff, and students is paramount to our mission and Core Values. More information can be found at: https://www.usj.edu/about-us/administrative-offices/presidents-office/office-of-diversityandinclusion-title-ix/. For any incident requiring an immediate response, contact public safety at 860.231.5222 or the police at 911.

ExamSoft

The Department of Nursing has contracted with a company called ExamSoft to administer tests and exams, using a computerized testing process. Examplify from ExamSoft provides a secure, offline testing program. There are multiple benefits to computer-based testing, including preparation for NCLEX licensing exam, reduction in academic integrity issues related to testing, mapping of test questions to the curriculum and program outcomes improving the overall academic rigor of our tests and exams. A $55.00 per student per calendar year fee will be attached to certain courses for students to be enrolled with this product.

Student Responsibilities Regarding ExamSoft

Your faculty will let you know if they will be using ExamSoft in their course. If your course will be using ExamSoft, you will be enrolled in ExamSoft by the program administrator and will receive a username and password from ExamSoft via email to create your account. When you receive your ExamSoft username and password, please visit the University of Saint Joseph Website (at ExamSoft) https://ei.examsoft.com/GKWeb/login/usjnursing and log into your account. You can then change your password if you like. A practice test may be administered to check the systems and give you a chance to see what it will be like prior to the real test. When taking a test, you will be unable to navigate to another website until the test is completed and submitted. For additional information about registering and using ExamSoft, please visit {Custom.support.examsoft.com} or call Examsoft at +1 954.429.8889.
Student responsibilities are:

1. Download the Examplify platform. You can find the system requirements and download at: https://examsoft.force.com/etcommunity/s/article/Examplify-Minimum-System-Requirements
2. Go to https://ei.examsoft.com/GKWeb/login/usjnursing and log in under 'Exam Takers' using:
   a. StudentID: {Custom.StudentID}
   b. Password: {Custom.Passwd}
3. Explore the various links and complete the tutorial prior to the start of classes
4. Download the Exam prior to the exam date and address any technical issues by calling the Office of Information Technology (OIT) at 860-231-5316, or emailing helpdesk@usi.edu.
5. Bring a fully charged laptop computer on exam day. Loaner laptops are available from OIT.
6. Technical issues that occur during the exam will need to be addressed by OIT.

**ATI Assessment and Remediation Policy**

Assessment Technologies Institute (ATI) is an assessment driven comprehensive review program designed to enhance student NCLEX® success.

The comprehensive ATI review program offers multiple assessment and remediation activities. These include assessment indicators for academic success, critical thinking, and learning styles. Additionally, online tutorials, online practice tests, and proctored tests are provided and span major content areas in nursing. These ATI tools, in combination with the nursing program content, will assist students to prepare effectively, helping to increase their confidence and familiarity with nursing content.

- **Review Modules:**
  ATI provides Review Modules in print and eBook formats that include written and video materials in key content areas. Students are encouraged to use these modules to supplement course work. Review Modules may be assigned by the instructor either during a given course and/or as part of active learning/remediation following assessments. ATI resources assigned in any nursing course are intended to support student learning.

- **Tutorials:**
  ATI offers Tutorials that are designed to teach nursing students how to think like a nurse, how to take a nursing assessment, and how to make sound clinical decisions. **Nurse Logic** helps nursing students to learn the basics of how nurses think and make decisions. **Learning System** offers practice tests in specific nursing content areas that allow students to apply the learning tools from Nurse Logic. Features such as a Hint Button, a Talking Glossary, and a Critical Thinking Guide are embedded throughout the **Learning System** tests to help students gain an understanding of the content.

- **Assessments:**
Standardized assessments will help the student to identify what content they are strong in, as well as areas that require more active learning and remediation. Practice assessments as well as standardized proctored assessments are scheduled during nursing courses.

- **Remediation:**
  Remediation of incorrect answers is required following practice and proctored assessments and is an important learning activity. Guidelines for grading of remediation will be presented in your syllabus.

**Accessing ATI.** Students are added as users of ATI during N200/201 by the Department of Nursing and assigned a product code to enter the ATI platform. It is highly recommended that all students spend time navigating through ATI orientation resources which can be accessed from your student home page at [www.atitesting.com](http://www.atitesting.com).

**Blackboard**
The Department of Nursing utilizes Blackboard as a platform for online and regular courses. Students should access Blackboard once each day to check for announcements or course updates. All grades will be posted on Blackboard for student review. Course documents and assignments may be posted as well at the discretion of the faculty member. Blackboard Resource helpline at 1-844-435-2163 or by live chat 24 hours/day, 7 days/week, 365 days/year. The web address is [www.Bb.usj.edu](http://www.Bb.usj.edu) and click on the technical support tab.

**Nursing Learning Center**
The Nursing Learning Center provides an environment where nursing students study and practice clinical skills. The following are services provided through the lab:
- Individual and group tutoring (by appointment only)
- Skill practice and simulations (by appointment)
- Study space for group work
- Practice with low and high-fidelity simulators (faculty or the lab Director must be present for some of these practices)
- Access to video library and other references covering a wide variety of topics

**Rules of Conduct for the Nursing Learning Center**
1. The Simulation lab is NOT a latex free environment. Please notify the Director of the Nursing Learning Center if you have a latex allergy.
2. No lab participant shall infringe upon the privacy, rights, privileges, health, or safety of other participants. The Nursing Learning Center Agreement on Professionalism and Academic Integrity in Simulation Experiences (Appendix D) must be read and the initialed on the Signature Sheet for the Student Handbook (last page).
3. Adherence to the University of Saint Joseph dress code is expected. You must be in uniform or wearing a lab coat to participate in any Simulation activity in the lab.
4. All electronics including cell phones, PDA’s, cameras, camera phones, and video recorders should be turned off during simulations.
5. Equipment should be disposed of in the appropriate container i.e. sharps containers, biohazard trash containers and laundry bins.
6. The lab should be left in the manner in which it was found. Please make all beds, change exam table paper, and return equipment to the appropriate storage area before leaving the lab.

7. In accordance with the Center for Disease Control (CDC), all sharps are to be handled safely and disposed of properly. In the event of a “clean” needle stick, the lab Director should be notified immediately so first aid can be provided and a minor injury report completed. In the event of a major injury, Public Safety will be notified.

8. Exceptions to the above rules are at the discretion of the Director or Course Faculty only. Failure to adhere to the rules may result in removal from the lab activity.

Sample Expenses for a Nursing Major
The expenses described below are meant to be a guide and are subject to change each year. The fees listed reflect approximations only.

- Background checks, immunizations, drug screening, fingerprinting, and other health care costs
- Ongoing computer access and internet service.
- Laptops are strongly recommended.
- Lab fees include the cost of ATI, supplies used in lab, as well as the cost of ExamSoft. These charges have been added to certain courses to spread them out over the curriculum.
- Expenses associated with clinical courses: purchase of uniforms, stethoscope, sphygmomanometer, scissors, pen light and ATI simulation for clinical make-up when required.
- Initial CPR certification and/or renewals
- Mileage or parking fees at clinical agencies
- Additional background checks as required by clinical agencies
- **Students who need to make up more than one clinical day will incur additional fees to compensate the faculty for additional time at the agency with the student.**
- Senior year additional expenses: Nursing pins—nursing pins vary in price depending upon the size, design, and metal of the pin (range is $23.00-$400+) and registration for the Connecticut State Board examination is $200.00.

*Additional fees for professional conferences can be expected, as well.*

Application for Licensure
All senior students will receive orientation and instruction about applying for the NCLEX examination in their capstone course.

Department of Nursing Honors and Awards

Sigma Theta Tau Honor Society
The purposes of Sigma Theta Tau are to recognize superior achievement of scholarship, to recognize the development of leadership qualities, to foster high professional standards, to encourage creative work, and to strengthen commitment to the ideals and purposes of the profession. Undergraduates are required to achieve a 3.0 GPA and rank in the upper 35th percentile of their class. They are also expected to meet the expectation of academic integrity. Students are required to have completed one fourth of the program of study to be considered for membership.
This program completion criterion refers to the total number of semester hours and is not limited to nursing courses only.

Sigma Theta Tau’s philosophy of membership is based upon the purposes of the society. Membership is a reward for achievement of the criteria for Sigma Theta Tau. Awarding membership encourages, fosters, and actively supports further professional development, thus promoting nursing scholarship, leadership, creativity and commitment to nursing.

**Awards**

**Peer Leadership Award** - This award is given to a graduating senior who is elected by peers. The recipient demonstrates:

- Willingness to mentor, support and foster the growth of peers rather than compete with them;
- Ability to collaborate with peers and faculty to further the interests of the nursing program;
- Respect for all individuals regardless of race, religion, ethnicity, values and/or beliefs;
- Commitment to own personal and professional growth and integrity.

**Nightingale Award** - This is an award given by faculty in honor of Dr. Charlotte Coe, a former faculty member and Chairperson of the Department of Nursing.

- 3.0 GPA or greater at the end of the fall semester senior year.
- Demonstration of clinical excellence.
- Evidence of university, community and professional activity.

**Professional Practice Award** - This award is given by faculty to a graduating senior. A student is chosen who has excelled in clinical practice and who has distinguished himself or herself through caring behaviors integrating the theoretical underpinnings of the University of Saint Joseph model for holistic care, patient and family centered practice and appreciation for the uniqueness of the individual in his/her practice.

**The Outstanding Scholastic Achievement Award**

The faculty of the Undergraduate Nursing Programs has established the Outstanding Scholastic Achievement Award, which is given each year to a student who has the highest GPA in their class at the completion of the nursing program.
Accreditation

The University of Saint Joseph is accredited by the New England Association of Schools and Colleges (NEASC). Complaints regarding the University may be sent to:

The New England Association of Schools and Colleges
3 Burlington Woods Drive, Suite 100
Burlington, MA 01803-4514
855.886.3272 https://cihe.neasc.org/about_us/staff/

CT Office of Higher Education

61 Woodland Street
Hartford, CT 06105-2326
800.842.0229 www.ctohe.org/studentcomplaints.shtml

The University of Saint Joseph Baccalaureate Nursing Program is accredited by the Commission on Collegiate Nursing Education (CCNE,) The National League for Nursing, and is approved by the Connecticut Board of Examiners for Nursing. Complaints regarding the program may be sent to the CT Board of Examiners for Nursing (BOEN) or the Collegiate Commission on Nursing Education (CCNE). Contact information for the nursing accreditation bodies are as follows:

Appendix B—Nursing Student Agreement for Clinical Experiences

1. **HIPAA:** I understand that information I may obtain during any Nursing Supervised Clinical Experience(s) may be confidential information and is protected by the HIPAA Privacy Rule (42 C.F.R. Parts 160 and 164) (the “Privacy Rule”) of the Health Insurance Portability and Accountability Act of 1996, as amended (“HIPAA”) and other state and federal laws and regulations.
   a. I agree that I will not disclose to any unauthorized parties any information received and/or generated through the course of the Nursing Supervised Clinical Experience. I agree to comply with HIPAA and all other state or federal laws and regulations.
   b. I understand that unauthorized use or disclosure of protected information may subject me to criminal and/or civil penalties, fines and/or imprisonment. I also understand that I must reimburse the institution for any damages caused by any disclosure by me of any protected information.

2. **Blood-borne Pathogens:** I agree to comply with the Occupational Safety and Health Administration of the United States Department of Labor (“OSHA”) regulations related to Occupational Exposure to Bloodborne Pathogens and all other applicable OSHA rules and regulations.

3. **Clinical Partners:** I agree to follow all policies, procedures, rules and regulations of our Clinical Partners.

4. **Contact with Clients:** I agree to comply with the Centers for Disease Control and Prevention of the United States Department of Health and Human Services (“CDC”) guidelines related to contact with clients and/or patients during clinical experiences.

5. **Physical Health:** I agree to provide evidence of passing a physical examination and that I know of no health issues that would place any clients and/or patients at risk. I agree to comply with the immunization requirements of our Clinical Partners and the University of Saint Joseph.

6. **Cost of Personal Medical Care:** I agree that I am solely responsible for the cost of any medical care rendered to me.

7. **Health Insurance Coverage:** I agree to comply with the USJ Department of Nursing health insurance coverage requirements and to provide evidence of health insurance coverage.

8. **Transportation to Clinical Experiences:** I agree that I am solely responsible for the cost of transportation to or from clinical experiences.

9. **Identification during Clinical Experiences:** I agree to wear University identification and a name tag at all times while participating in the Nursing Supervised Clinical Experience at the Institution.

10. **Loss or Damage to Personal Property:** I acknowledge that the University of Saint Joseph will not be responsible for loss or damage to my personal property while on the Institution’s premises during the Nursing Supervised Clinical Experience.

11. **Indemnity:** I agree to indemnify, defend and hold harmless the Institution and the University, their respective agents, faculty, staff, Students and employees from any and all claims, damages, liabilities, costs and expenses including without limitation, reasonable attorney’s fees, arising
out of, or caused by my negligent acts or omissions while on the Institution’s premises during
the Nursing Supervised Clinical Experience.

Appendix C ACCIDENTAL INJURY AND BLOOD-BORNE PATHOGEN POST-EXPOSURE PROTOCOL

1. TREAT THE EXPOSURE SITE
   - wash exposed skin with soap and water
   - flush exposed mucous membranes with water
   - flush exposed eyes with water or saline

2. NOTIFY YOUR CLINICAL INSTRUCTOR
   - and follow institutional and program-specific procedures

3. SEEK CARE AS SOON AS REASONABLY POSSIBLE
   - at the emergency department of your assigned facility or nearby hospital or
   - at PhysicianOne Urgent Care

4. PRESENT THE UNIVERSITY-PROVIDED INSURANCE AT TIME OF CARE ALONG WITH YOUR PERSONAL MEDICAL INSURANCE INFORMATION
   - your personal medical insurance policy is the primary policy
   - the Wellfleet insurance policy (below) is the secondary policy

   | Carrier: WELLFLEET SPECIAL RISK PO |
   | BOX 15369 |
   | SPRINGFIELD, MA 01115-5369 |
   | Fax: 413.733.4612 |

   | Policy: M0000700775 |
   | Group: SR511364PA |
   | Inquiries: specialriskCS@wellfleetinsurance.com |
   | 877.657.5039 |

5. COMPLETE AN INJURY REPORT
   - forward to healthservices@usj.edu with notification of your injury or exposure

DON approved 9.26.22
6. MEDICAL FOLLOW-UP WILL BE DETERMINED BY THE TREATING PROVIDER
   - Student Health Services is not involved in your initial and subsequent care
   - you are responsible for complying with the recommended follow-up, if any

7. SUBMIT ALL BILLS AND EOB (estimation of benefits) STATEMENTS
   - forward to healthservices@usj.edu with notification of your injury or exposure

Appendix D—Technical Standards

Introduction

Technical standards are all of the nonacademic functional abilities essential for the delivery of safe, effective nursing care. The ability to meet the technical standards is a required component of satisfactory progression through the nursing program and is necessary to meet the clinical competencies established in specific courses.

Students with a physical or mental condition that interferes with their ability to meet the technical standards of the Nursing Program must contact the Accessibility Coordinator as soon as possible to discuss the issue. The Accessibility Coordinator will then work with the student to identify the extent of the student’s limitations and reasonable accommodations. Reasonable accommodations will be directed toward providing an equal educational opportunity for students with disabilities while adhering to the standards of nursing practice for all students. Documentation from the student’s health care provider may be required.

During a student’s course of study, a change in the ability to meet a technical standard needs to be reported to the course faculty, the Clinical Coordinator and the Chair of the department in a timely manner. This may be accomplished with an email. Students are not required to discuss specifics of their medical diagnosis but are advised to contact the Accessibility Coordinator to discuss reasonable accommodations that would allow the student to meet the technical standards.

Students should follow these guidelines in requesting accommodations in the academic or clinical setting:

- Seek advisement from the Accessibility Coordinator as soon as possible after admission to the Nursing Program to facilitate the timely development of a plan for accommodation, which would ideally be in place at the beginning of the Program. Alterations in a plan for accommodation must be arranged with the Accessibility Coordinator.

- Applicants seeking admission into the Nursing Program who may have questions about the technical standards and reasonable accommodations are invited to discuss their questions with Accessibility Coordinator.

- It is the student’s responsibility to demonstrate her/his/their capacity to meet the Technical Standards. Inability to meet the Technical Standards with reasonable accommodations may result in dismissal from the nursing program.
Technical Standards

The CT Board of Examiners for Nursing requires nurses to perform assessments of patients and their environments, as well as to implement nursing care that is developed from such assessments. The practice of Nursing requires the following functional abilities with or without reasonable accommodations:

A. Sensory/Observational Standards
   a. Visual acuity—Examples of relevant activities (nonexclusive):
      • Detect changes in skin color or condition
      • Collect data from recording equipment and measurement devices used in patient care
      • Detect a fire in a patient area and initiate emergency action
      • Prepare medications
      • Read patient records
   b. Auditory ability—Examples of relevant activities (nonexclusive):
      • Identify and interpret assessment data such as heart, lung, and bowel sounds, blood pressure, etc.
      • Detect audible signals generated by mechanical systems that monitor bodily functions
   c. Tactile ability—Examples of relevant activities (nonexclusive):
      • Identify and interpret assessment data such as skin temperature, pulses, etc.
      • Detect unsafe temperature levels in heat-producing devices used in patient care
      • Detect anatomical abnormalities, such as subcutaneous crepitus, edema, or infiltrated intravenous fluid
      • Perform techniques such as the insertion of urinary catheters

B. Physical Standards
   a. Strength and mobility must be sufficient to perform patient care activities and emergency procedures. Examples of relevant activities (nonexclusive):
      • Safely transfer patients in and out of bed and assist them with ambulation using appropriate assistive devices
      • Support the weight of the patient as well as equipment
      • Turn and position patients
      • Hang intravenous bags at the appropriate level
      • Perform cardiopulmonary resuscitation
b. **Kneeling and Bending**
   - Accurately read the volumes in body fluid collection devices hung below bed level
   - Provide patient care at a low level or on the floor

c. **Fine motor skills and hand-eye coordination** must be sufficient to perform psychomotor skills integral to patient care. Examples of relevant activities (nonexclusive):
   - Safely dispose of needles in sharps containers
   - Complete tasks such as placing a stethoscope, starting an IV, etc.
   - Manipulate small equipment and containers to prepare and administer medications.

d. **Physical endurance** must be sufficient to complete assigned periods of clinical practice and to respond quickly in emergency situations.

C. **Communication Standards**

a. **Speaking and Writing**: Ability to speak, comprehend, read, and write English at a level that provides accurate, clear, and effective communication with patients, families and health care professionals

b. **Professional Comportment** is necessary to function effectively under stress, to work as a part of a team and to respond appropriately to supervision; to adapt to changing situations, to respond appropriately to patients and families under stress, and to follow through on assigned patient care responsibilities.

c. **Interpersonal skills** are necessary to constructively manage the emotional demands of the nursing profession. This is reflected in the ability to:
   - Establish therapeutic boundaries
   - Provide client with emotional support
   - Adapt to changing environment/stress
   - Deal with the unexpected (e.g., patient deterioration, crisis)
   - Focus attention on task
   - Monitor own emotions
   - Perform multiple responsibilities concurrently
   - Accept feedback from patients and colleagues
   - Handle strong emotions (e.g., grief, anger, aggression)
   - Behave in a civil manner (See Civility Statement in Undergraduate Handbook).

D. **Cognitive ability** to collect, analyze and integrate information and knowledge to make clinical judgments and management decisions that promote positive patient outcomes.

E. **Other Abilities** sufficient to demonstrate competencies such as the ability to arrive to a clinic on a timely basis; to meet the demands for timely performance of duties; to meet the organizational requirements to perform these duties in a professional and competent manner.

*DON approved 9.26.22*
Appendix E—Nursing Learning Center Agreement
Professionalism and Academic Integrity in Simulation Experiences

Throughout their nursing education, all students participate in simulation exercises as an essential element of their clinical learning experience. Simulations are performed with groups of students and the same simulation is often scheduled sequentially with different groups. To assure maximum learning potential, it is important to assure that all students are able to experience each simulation without prior exposure to any of its content. To assure that all students can participate in a safe and comfortable learning environment during simulations, it is imperative that all students maintain a respectful and collegial posture toward their student colleagues both during and after the completion of any simulation experience.

Diversity, Health Equity, & Inclusion Statement
The Nursing Learning Center & Simulation strives to foster an environment where similarities and differences are not only embraced and valued, but also celebrated. We acknowledge that institutional diversity is the cornerstone for the advancement of knowledge, the delivering of equitable care, and increasing access to care for all.

By working collaboratively with faculty, staff, students, and our community partnerships, the Nursing Learning Center & Simulation at the University of Saint Joseph, strives to educate a culturally responsible and socially accountable healthcare workforce to meet the ever-evolving needs of the diverse populations we serve.

Therefore, it is critical to the quality and integrity of this type of learning experience that all students agree to adhere to the following guidelines:

1. All information related to any simulation, including patient information (real or fictional) and electronic, written, overhead or observed materials related to the simulation is to be considered privileged and confidential. Students are prohibited from discussing any information relating to a simulation with classmates who are not members of their specific simulation lab group.
2. The simulation lab is to be treated as a safe learning environment that prepares students for practice with actual patients. Therefore, when practicing simulations, the student nurse’s role is to assume all aspects of a practicing health care provider’s appropriate professional, ethical, and interpersonal behavior.
3. All students participating in any simulation should feel safe during the exercise and should receive respectful and non-judgmental attention from their student colleagues. Discussing any student’s simulation performance outside of the lab situation is prohibited and may result in disciplinary action.
4. Video/audio recording may be utilized during specific simulation scenarios as an assessment tool for debriefing that will be done at the end of the exercise. Students are prohibited from discussing any element of these recordings outside of the learning lab.

Please initial and sign the signature sheet at the end of the handbook.

DON approved 9.26.22
Undergraduate Student Handbook Signature Sheet

Please upload this form to Castle Branch within 1 week of receipt.

Directions: Please initial each item inside the box.

☐ 1. Student Handbook for Undergraduate Nursing Students: I acknowledge that I have received and read a copy of the 2021-2022 University of Saint Joseph Student Handbook for Undergraduate Nursing Majors. I furthermore agree to abide by all the rules, regulations, and policies stated herein. I acknowledge that I am responsible for following these policies, and if I do not understand them, it is my responsibility to seek clarification PRIOR to an issue. This applies to all the documents listed below.

☐ 2. Release of Photograph to Clinical Agencies: I give permission to release my photograph to clinical agencies upon their request. These will be used for facility-specific identification.

☐ 3. Academic Integrity Policy: I have reviewed the University of Saint Joseph Academic Integrity policy

https://my.usj.edu/ics/icsfs/USJ_Academic_Integrity_Policy_.pdf?target=ba6f34fe-ece5-4e25-9cc7-9df36e8bd804

☐ 4. Nursing Learning Center Agreement: I agree to adhere to the guidelines of the Nursing Learning Center Agreement.

☐ 5. Technical Standards: I have read and understand the Technical Standards.

☐ 6. Nursing Student Agreement for Clinical Experiences: I agree to abide by the policies outlined in the Nursing Student Agreement for Clinical Experiences document.
